

# glowgold

for kids with cancer

**359**

children, on average are diagnosed with cancer each year in Virginia.

**2/3**

of all childhood cancer survivors develop late effects from treatment that make it harder to learn and thrive.

**46%**

of children who survive cancer will experience educational or other problems in school.

Tecumseh, age 13, was diagnosed with T-Cell Acute Lymphoblastic Leukemia (ALL).

**Our goal during the month of September is to light up one house, business, or landmark for every child diagnosed each year in our state. By doing this we hope to raise awareness for the challenges these kids face - from diagnosis, to treatment, and through survivorship.**

**Take the pledge.**

Visit [glowgoldva.org](http://glowgoldva.org) to sign the pledge to Glow Gold during the month of September.

**Go GOLD!**

Buy your gold light bulb and light up your home to visibly show your support.

**Spread the word.**

Share #glowgoldva with neighbors, friends and family - in person and virtually on social media!

**Take the pledge at**
